

Hi Meldrick,

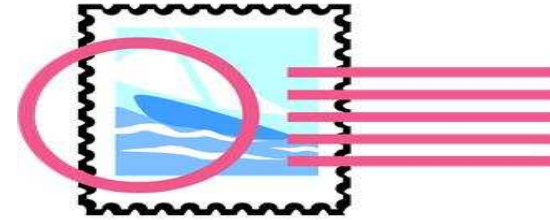

How are you? Good? Good. I just wanted to tell you that Stonehenge is great without you. I hope it gets you mad. Is it working? I hope while you're reading this, you have a horrible time in Winterpeg.

I bet you didn't know that it's located on Salisbury Plain in Southern England, because I didn't. These large megaliths weigh up to 48 tonnes! They were also built 4,000 years ago. I know, unbelievable. You know what I think is crazy? How they were cut from solid rock 30 km away. It's also weird how some scientists believe Stonehenge is used for astronomy.

Okay, well I have to go now. I feel like I'm wasting my time on a tiny person like you. Just kidding!

See you soon,  
*Maya Ladesma*

PS. Who's the smart one now? THIS GIRL.—ML
